**Subject:** Treasure Island Site 12

On the BCT webinar. Navy has a current rad investigation ongoing. They have found elevated gamma readings in buildings 1306, 1303, 1128, & 1126. Investigations are ongoing. When completed, site 12 will have been completely surveyed. Other BCT members have received calls from residents who are concerned or upset. The Navy suggested I contact Steve Woods as a first step and discuss my phone call with him.

There will be a report forthcoming in April Rob, might be good if you can review. I'll keep everyone posted on further developments.
